Phone Number: +971 50 751 7446
Nationality: Canadian

QUALIFICATIONS SUMMARY

- Over 5 years of experience as a Software Engineer and an Information Technology Specialist with experience in ASP.NET, Javascript, CSS, PLSQL, and .NET Core technologies, frameworks, and libraries, along with proven expertise in designing scalable, high-performance, and secure .NET applications.
- Dynamic, diligent, and skilled Software Engineer proficient in Java 7/8, Java EE, Python, C/C#/C++, JavaScript, .NET, WebDev frameworks like React, Bootstrap, and Flask, and DB systems including MySQL, MongoDB, and FirebaseDB.
- Academic certifications include a Masters degree in Software Engineering and a Bachelors degree in Computer Science with Software Engineering Specialization.
- Effective communication with all levels of management. Familiarity with social engineering techniques, including proficiency in developing training materials and activities.

TECHNICAL SKILLS

Languages: Java 7/8, Java EE, Python, C, C++, C#, mySQL, JavaScript, jQuery, Swift, Kotlin, PHP, HTML5, CSS/CSS3, ReactJS, NodeJS, LaTeX, XML

Operating Systems: iOS, Windows, MacOS, Android, Linux, Unix

Frameworks: React, Bootstrap, Flask, JUnit, WordPress, FastAPI, Git

Developer Tools: GitHub, Docker, Google Cloud Platforms, Visual Studio Code, IntelliJ, Eclipse, Itemis CREATE, CompTIA Security+, Network+, Sun system, Micros, Opera, Adobe, Zoho Software

Specializations: IoT, CPS, Model-Driven Engineering (MDE), Machine Learning (ML), Digital Twins

EDUCATION

Toronto Metropolitan University

Toronto, ON, Canada

Masters of Science in Software Engineering

- Thesis in Model-Driven Engineering Domain
- Ryerson Graduate Fellowship Recipient - 3.92 GPA
- Published Model-Driven Engineering Author - ANNSIM 2023

University of Windsor

Windsor, ON, Canada

Bachelors in Computer Science with Software Engineering Specialization

- Minor in Mathematics and Statistics
- UWindsor Scholarship Recipient - 3.2 GPA

EXPERIENCE

Information Technology Support Specialist & Full-Stack Web Developer

Sep 2021 – Present

Toronto Metropolitan University

Toronto, ON, Canada

- Developed a full-stack web portal site for the Lincoln Alexander School of Law using Bootstrap framework and FirestoreDB.
- Provided comprehensive technical support to faculty, staff, and students. Troubleshooting intricate hardware and software issues was a key aspect of my role

Jr. Software Engineer

Jun 2022 – Aug 2022

ADP Technology Inc.

Etobicoke, ON, Canada

- Collaborated with senior developers to design, develop, and deploy web applications and services using modern technologies.
- Assisted in frontend development, creating responsive and intuitive user interfaces with HTML, CSS, and JavaScript frameworks such as React.js.

Jr. Web Developer (Contract)

Sep 2021 – Apr 2022

CompTia - TechTalent Accelerator

Toronto, ON, Canada

- Contributed as a Junior Web Developer at CompTIA TechTalent, actively participating in the development and maintenance of web-based projects and applications.

Full-Stack Web Developer

May 2021 – Aug 2021

Google Inc.

Toronto, ON, Canada

- Collaborated within a dynamic team at Google, contributing to the development of innovative web applications and services.
- Designed and implemented intuitive user interfaces using HTML, CSS, and JavaScript frameworks such as Bootstrap.
- Integrated with a NoSQL database, FirebaseDB, to support data persistence and retrieval, optimizing database queries for efficiency.

Front-End Web Developer

Dec 2019 – Apr 2020

Splice Digital Inc.

Windsor, ON, Canada

- Played a key role in implementing responsive and visually appealing user interfaces using HTML, CSS, and JavaScript, ensuring optimal user experiences across various devices and browsers.

PROJECTS

Rainbow E-Commerce Site | *Bootstrap, WordPress, HTML5/CSS, JQuery*

Feb 2024 – Present

- Designed and implemented responsive and user-friendly interfaces, enhancing the overall shopping experience for customers across various devices.
- Provided ongoing maintenance and support to ensure the website's continued functionality and performance, accommodating any updates or changes requested by the client.

myBudgetPal | *Machine Learning, HTML5/CSS, JQuery, FirestoreDB*

Jan 2024 – Present

- Pioneered the development of MyBudgetPal, a groundbreaking budgeting tool that harnesses machine learning techniques to predict personalized budgeting methods for clients, revolutionizing financial planning.

myLinc Web Portal | *Bootstrap, HTML5/CSS, JQuery, AmazonDB*

Sep 2023 – Present

- In charge of the development of the myLinc Web Portal, a centralized platform designed to serve as the primary hub for students and faculty of the Lincoln Alexander School of Law, facilitating seamless communication, collaboration, and access to resources.

Statechart Template Library for IoT System Design (STL4IoT)

Sep 2021 – Jan 2024

- Led the full development of the Statechart Template Library (STL) for IoT Systems, a cutting-edge framework designed to streamline the development of complex IoT applications using statechart-based design methodologies.
- Utilized Itemis Create to design and visualize complex statechart diagrams representing the behaviour and logic of IoT systems, providing a clear and intuitive representation of system behaviour.
- Engineered a comprehensive library of reusable statechart templates tailored specifically for IoT applications, leveraging the capabilities of Itemis Create to streamline the development process.
- Co-authored a published paper at ANNSIM 2023 with Dr. Sadaf Mustafiz.
<https://ieeexplore.ieee.org/document/10155348>

PeekSearch | *GoogleAPI, Bootstrap, Firestore, HTML5/CSS, JQuery*

Nov 2020 – Apr 2021

- Conceptualized and developed PeekSearch, an innovative web application utilizing the Google Maps API to display real-time traffic data and help users navigate crowded areas, aiding in social distancing efforts during the COVID-19 pandemic.
- Engineered backend systems to fetch and process real-time traffic data, leveraging the Google Maps API and other technologies to ensure accurate and timely updates.

myAcAdvisor | *Machine Learning, Bootstrap, SQL, HTML5/CSS, JQuery*

Jan 2020 – Dec 2020

- Employed advanced machine learning algorithms to analyze diverse student data, including academic records, performance metrics, and behavioral patterns, to generate personalized insights and recommendations.
- Engineered robust backend systems to handle data processing and model training, utilizing Python libraries such as TensorFlow or scikit-learn to develop accurate predictive models.
- Web App: <https://myacadvisor.web.app/>

StreamFlix | *Java, Android Studio, FirestoreDB*

Jan 2019 – Apr 2019

- Led the development of StreamFlix, a cutting-edge platform utilizing the Google Maps API to aggregate and showcase the latest livestreamed events based on users' geographic locations, providing a seamless experience for accessing live content.
- Integrated the Google Maps API to enable dynamic geolocation-based filtering, allowing users to discover nearby livestreamed events tailored to their specific location and preferences.
